## **REMARKS**

A Request for Extension of Time accompanies this paper.

In this paper, claims 4, 6-8, 10-12, 15-17, 19, 23, 25, and 27-29 have been amended. Claims 1-29 remain in the application.

The amendments to claims 6, 7, 10, 17, and 23 are merely formal and do not narrow the scope of any one of those claims. These amendments are made to correct manifest informalities of grammar or syntax.

The amendments to claims 4, 8, 11, and 12 merely adjust dependency and provide antecedent basis for terms in those claims. These amendments correct errors introduced when automatic word processing failed to change dependency as the claims evolved during drafting. These errors were manifest and these amendments remove them and make explicit what was implicit in these claims before amendment.

The amendments to claims 15, 16, 19, and 25 and 27-29 merely add terms that point to antecedent basis provided by claims from which they depend, or which depend from them. They are formal and make manifest what was evident, but implicit, before amendment.

Objection is made in the Official Action to claims 1 and 20. The basis for objection to claim 1 is for the form of spelling the past tense of the verb "focus" as "focussed". In fact, the definition of "focus" in *Riverside Webster's II New College Dictionary* shows one form of the verb spelt identically. The first basis for objection to claim 20 is for an incorrect grammatical usage of the term "position" in line 2 of the claim. No instance of any form of the word "position" appears in the claim. The second basis for objection to claim 20 is for use of the term "display" in line 2. In fact, the noun form of "display" is defined in the *Riverside* dictionary as "the act of displaying". Accordingly, the spelling of "focused" in claim 1 is correct, the usage of "display" in claim 20 is correct, and the Examiner is requested to withdraw this objection.

Claim 1 is rejected for indefiniteness on the basis that selection optics are limited to being "positioned between" a sample volume and a plurality of detectors. The Applicants respectfully disagree. The rejection presumes that the term is limited to a single meaning: the selection optics must be "physically located between" the sample volume and the detectors (Office Action, paragraph 6, lines 3-6). It is presumed that this means the selection optics must be on a straight line connecting the sample volume with the plurality of detectors, intermediate the sample volume and detectors. There is no basis in the specification, or in the common usages and meanings of the phrase "positioned between" for such a narrow, constrained interpretation. Indeed, as pointed out in the Office Action, Fig. 1A of the specification shows the selection optics being positioned "along the optical path B ... ". It is noted that the "optical path

B" connects the sample volume with the plurality of detectors. This conforms with one of the definitions of "between" in the *Riverside* dictionary, that is "connecting spatially". Thus, as Fig. 1A shows, the selection optics are on an optical pathway or route that spatially connects the sample volume and the plurality of detectors. Therefore, the selection optics are indeed "positioned between" the plurality of detectors and the sample volume. However, that is not to say that this is the only meaning of the phrase in this application, and in claim 1. Indeed, as pointed out in the Office Action, the phrase in claim 1 may have other meanings, including "physically located between". Accordingly, the applicants respectfully request withdrawal of this rejection.

Claims 4, 6, 7, 8, 10, 11, 13, 15, 16, 19, 23, 25, 28, and 29 have been rejected for indefiniteness on various bases. It is submitted that amendments made in this paper have removed all of these bases, and the applicants respectfully request withdrawal of this rejection.

Claims 1, 2, 4-10, 12, 16, 17, and 24 are rejected for anticipation by US Patent No. 6,024,283 ("Campanelli"). That rejection is respectfully traversed for the following reasons.

Axiomatically, rejection of a claim for anticipation by a reference requires that the reference explicitly include, in its four corners, all elements or steps, and all limitations thereof recited in the rejected claim. Any subject matter of the claim that is missing from the reference is inherent in the reference only if extrinsic evidence clearly shows that the missing subject matter is necessarily present in the thing described in the reference and that it would be so recognized by persons of ordinary skill. Furthermore, to anticipate a claim, a reference must enable the claimed subject matter.

Taking claim 1 as representative, a system for imaging a sample is claimed. The system includes "a plurality of detectors which are each focussed at a respective focal plane in a sample volume ... ". The light selection optics transmit light "originating at the respective focal planes while screening out light which originates from outside of the respective focal planes." As a result, "a three dimensional image of the sample can be obtained by combining the image from each detector." Specification, P. 4, II. 12-14. Similar limitations are found in claim 24. At C. 8, II. 32-35 of Campanelli, the elements read "a symbol located at a distance from the reader ...". But, where is such a symbol located? According to Campanelli at C. 1, II. 27-29, such indicia appear "on a label or on the surface of an article." Campanelli essentially wants a single, planar, two dimensional picture. Therefore, in Campanelli there is no "sample volume", and there are no "focal planes in a sample volume". Accordingly, Campanelli omits subject matter that is explicitly recited in claims 1 and 24, and in claims 2, 4-10, 12, 16, and 17, which depend from claim 1.

If the "sample volume" and the respective focal planes "in a sample volume" are considered to be inherent, the applicants respectfully request the introduction of extrinsic evidence which clearly shows that the missing subject matter is necessarily present in the bar code reader described in Campanelli and that it would be so recognized by persons of ordinary skill.

It is further noted that the passage of Campanelli cited to support the rejection of claims 1 and 24, and the associated figure (FIG. 3c) does set forth a sample volume. Instead, there is only a planar bar code 37 through which light beams are focussed by a lens 38 at different distances. The distances are evidently available in order to provide manual or automatic selection of "a focal plane of interest ... ". Campanelli, C. 8, II. 27-29. So, evidently, Campanelli enables the selection of "a" (single) focal plane. There is no description in connection with this passage, or any illustration in FIG. 3c of Campanelli, that enables "transmitting to the detectors a portion of light originating at the respective focal planes while screening out light which originates from outside of the respective focal planes." Further, Campanelli at C. 8, II. 23-42, and in FIG. 3c, does not teach or show how a plurality of detectors can be "focussed at a respective focal plane in a sample volume". Campanelli describes only one detector in this context at C. 8, II. 14, 15. But, the "detector 38" is nowhere illustrated (reference numeral 38 in FIG. 3 denominates a lens) or further described. Accordingly, Campanelli does not enable the subject matter of the rejected claims.

In view of a failure to include all of the subject matter of, and a failure to enable, claims 1, 2, 4-10, 12, 16, 17, and 24, Campanelli does not anticipate these claims.

Claims 3, 11, 13-15, and 18 are rejected for obviousness over Campanelli. That rejection is respectfully traversed for the following reasons.

*Prima facie*, rejection of a claim for obviousness over a modified reference requires a teaching or suggestion to modify the reference as proposed in the rejection, a reasonable expectation of success, and inclusion in the modified reference of all elements or steps, and limitations thereof recited in the claim. See MPEP 2142, *et seg*.

As already set forth above, Campanelli omits a "sample volume" and respective focal planes "in a sample volume". These limitations are not suggested by Campanelli. Campaneli's problem is to acquire a single, two-dimensional image of a symbol appearing on a label or a surface. The rejected claims are directed to the problem of acquiring an image of a sample volume-a three dimensional object. Accordingly, Campanelli does not satisfy the requirements of *prima facie* obviousness.

In view of the remarks made in this paper, it is submitted that all of the claims define subject matter that is patentably distinct from the references of record, early notice of which is earnestly requested.

Enclosed is a check in the amount of \$460.00 for the three (3) month extension of time fee for a small entity. The Commissioner is hereby authorized to charge any fees that may be associated with this communication, or credit any overpayment to Deposit Account No. <u>50-2258</u>. A duplicate copy of this sheet is enclosed.

Respectfully submitted

TERRANCE A. MEADOR

Reg. No. 30, 298

Telephone: (858) 638-6747 Fax: (858) 638-6727

## **VERSION WITH MARKINGS TO SHOW CHANGES MADE**

## In the claims:

- 4. (Amended) The system of claim [1] 2, wherein the ON regions can be controllably changed to OFF regions and the OFF regions can be controllably changed to ON regions.
- 6. (Amended) The system of claim 4, wherein a pattern of ON and OFF regions controls [the] <u>a</u> degree of confocality provided to the view from each detector.
- 7. (Amended) The system of claim 4, wherein the light selection optics concurrently provide [the] <u>a</u> degree of confocality to each of the detectors in the plurality of detectors.
- 8. (Amended) The system of claim [1] 2, wherein the light selection optics includes a plurality of mirrors which can occupy an ON position or an OFF position, the ON regions transmitting the light from the respective focal planes and the OFF regions blocking the light from the respective focal planes.
- 10. (Amended) The system of claim 1, further comprising:
  focus differentiation optics which causes each detector to be focussed at [the]
  different depths within the sample.
- 11. (Amended) The system of claim [9] 10, wherein the focus differentiation optics can be adjusted so as to alter where a detector is focussed within the sample.
- 12. (Amended) The system of claim [9] 10, wherein each detector is positioned equidistant from the focus differentiation optics.
- 15. (Amended) The system of claim 1, further comprising:
  a light source and optics configured to illuminate the sample <u>volume</u> with a light which causes a dye in the sample to fluoresce.
  - 16. (Amended) The system of claim 1, further comprising:

a light source and optics configured to illuminate the sample <u>volume</u> and transfer reflected light from the sample to the detectors.

- 17. (Amended) The system of claim 1, further comprising:relay optics positioned between the light selection optics and the detectors.
- 19. (Amended) The system of claim 1, further comprising: a sample fixture for holding the sample volume being viewed, the sample fixture configured to scan the sample relative to the light selection optics.
- 23. (Amended) The system of claim 1, wherein the selection optics increase [the] a ratio of intensity of light received at the detector which originates from the associated focal plane to the intensity of light received at the detector which originates from outside the associated focal plane.
- 25. (Amended) The method of claim 24, further comprising:

  moving the sample <u>volume</u> so at least a portion of the sample <u>volume</u> is scanned by the detectors.
- 27. (Amended) The method of claim [24] <u>26</u>, further comprising: filtering the output from each detector to provide <u>a filtered</u> 3D <u>image</u> [filtered output].
- 28. (Amended) The method of claim 27 further comprising utilizing the processing, display and storage system to segment the 3D image into 3D object segments.
- 29. (Amended) The method of claim 28 utilizing the processing, <u>display and</u> storage system to classify [the] objects into types of objects based on measurements processed from the 3D object segments.

from town, is considered by many to be unacceptable in formal style. -n. 1. Something better. 2. A superior, as in position or intelligence. -v. tered, tering, ters. -vt. 1. To improve < bettered my position in life > 2. To surpass : exceed. -vi. To become better. bet-ter2 (bet/or) n. var. of BETTOR.

better half n. [< my better half, the larger part of me, that is, a close friend.] Informal. One's spouse.

bet-ter-ment (bet'ar-mant) n. 1. An improvement. 2. An improvement that repairs real property and adds to its value.

bet-ter-off (bet'ar-ôf', -ôf') adj. Being in a better or more prosper.

ous condition.

bet-tor also bet-ter (bet'ar) n. One who bets. be-tween (bi-twen') prep. [ME betwene < OE betweenum.] 1. a. in the interval or position separating < between the buildings < between Thanksgiving and Christmas> b. Intermediate to, as in quantity, amount, or degree < measures between four and five feet> 2. Connecting spatially < a route between Dallas and Fort Worth> 3. a. By the combined effect or effort of <Between the sun and wind, the wash dried. > b. In the combined ownership of <They had a controlling interest between them. > 4. As measured against. — Used often to express a reciprocal relationship <choose between swimming and tendership of the combined ownership of the same of the controlling interest between them. > 4. As measured against. — Used often to express a reciprocal relationship <choose between swimming and tendership of the combined of the nis> -between you and me. In strictest confidence. -in be-

tween. In an intermediate situation. — be-tween' adv.

be-tween-times (bi-twen' timz') adv. At or during pauses.

be-twixt (bi-twikst') adv. e) prep. [ME < OE betwyx.] Archaic.

Between. — betwixt and between. In an intermediate position.

Beu-lah (byoo'la) n. 1. The land of Israel in the Old Testament. 2.

The land of peace in Bunyan's Pilgrim's Progress.

bev-a-tron (bev'a-tron') n. [B(ILLION) + E(LECTRON) + V(OLTS) + TRON.] Physics. A proton synchrotron.

bev-el (bev'al) n. [OFr. \*bevel < baif, open-mouthed < bayer, to gape.] 1. The angle or inclination of a surface or line that meets an archer to reason and the surface of the control of the surface other at any angle but 90°. 2. A rule having an adjustable arm used to draw or measure angles or to fix a surface at an angle. -v. -eled, -el-ing, -els or -elled, -el-ling, -els. -vt. To cut at an inclination that forms an angle other than a right angle. -vi. To be inclined

bevel gear n. Either of a pair of gears having teeth surfaces cut so

that the gear shafts are not parallel. bev-er-age (bev'ar-ij, bev'nij) n. [ME beverege < OFr. bevrage < beivre, to drink < Lat. biber.] A liquid for drinking, usu. excluding

bev-y (bev'e) n., pl. -ies. [ME.] 1. A group of birds or animals, esp.

larks or quail: FLOCK. 2. A group: assemblage. be-wail (bi-wāl') vt. -wailed, -wail-ing, -wails. 1. To express sorrow or regret over. 2. To cry about. -be-wail'er n. be-ware (bi-wār') v. -wared, -war-ing, -wares. [ME be ware: be, imper. of been, to be + ware, on one's guard (< OE wær).] - vt. To

be cautious of. — vi. To be cautious.
be-whis-kered (bi-hwis'kərd, -wis'-) adi. Having whiskers.
be-wil-der (bi-wil'dər) vt. -dered, -der-ing, -ders. 1. To befuddle or confuse, esp. with a variety of conflicting situations, objects, or statements. 2. To cause to lose one's bearings. — be-wil'dered-ly adv. — be-wil'dered-ness n. — be-wil'der-ing-ly adv. — be-

wil'der-ment n be-witch (bi-wich') vt. -witched, -witch-ing, -witch-es. [ME be-witch (bi-wich') vt. -witched, -witch-ing, -witch-es. [ME bewicchen: be, thoroughly + wicchen, to enchant < OE wiccian < wicca, witch and wicce, wizard.] To place under one's power by or as if by magic: captivate totally. - be-witch'er-y n. - be-witch'ing adj. - be-witch'ing-ly adv. be-witch-ing (bi-wich'ing) adj. Enchanting as if with a magic spell: FASCINATING. - be-witch'ing-ly adv. be-witch-ment (bi-wich'mont) n. 1. The act of bewitching or the state of being bewitched. 2. A spell that bewitches. be-wray (bi-ra') vt. -wrayed, -wray-ing, -wrays. [ME bewreien he: thoroughly + wreien, to accuse < OE wregan.] Archaic. To dis-

be, thoroughly + wreien, to accuse < OE wregan.] Archaic. To disclose, esp. unintentionally: BETRAY.
bey (bā) n. [Turk.] I. A provincial governor in the Ottoman Empire. 2.

A ruler of the former kingdom of Tunis. 3. A Turkish title of honor and respect

respect.

be-yond (be-ond', bi-yond') prep. [ME < OE begeondan.] 1. On the far side of: PAST. 2. Later than 3. Past the understanding, reach, or scope of <cruelty beyond words> 4. To a degree or amount greater than <ri>rich beyond my wildest hopes> 5. In addition to <sought nothing beyond bread and shelter> — be-yond' adv.

bez-ant (bez'ant, ba-zānt') [ME besant < OFt. < Lat. Byzantius, of Byzantium.] 1. A gold coin issued in Byzantium: SOLIDIS. 2. A flat

Byzantium.] 1. A gold coin issued in Byzantium: solidus. 2. A flat disk used as an architectural decoration.

disk used as an architectural decoration.

bez-el (bez'sl) n. [Orig. unknown.] 1. A slanting surface or bevel on the edge of a cutting tool. 2. The upper, faceted portion of a cut gem above the girdle. 3. A groove or flange that holds a beveled edge, as of a watch crystal or a gem. be-zique (ba-zek') n. [Fr. bésique.] A card game similar to pinochle

that is played with a deck of 64 cards.

be-zoar (bē'zòt'), -zōt') n. [ME bezear < OFr. bezar < Ar. bāzahr <
Pers. pād-zahr : pād, protecting against + zahr, poison.] A hard gastric or intestinal mass found chiefly in ruminants and once regarded as a magical antidote to poison.

B-girl (be'gûrl') n. [B(AR) + GIRL.] A woman who works in a bar and encourages customers to spend money freely.

Bha-ga-vad-Gi-ta (bā'gə-vād-gē'tə) n. [Skt. bhagavad-gītā, song

of the blessed one (Krishna).] A sacred Hindu text that is part of the Mahabharata, an ancient Sanskrit epic.

bhang also bang (bang) n. [Hindi bhāng < Skt. bhangā.] 1. The hemp plant. 2. Any of several narcotics made from the dried flowers and leaves of hemp

Bhu-tan-ese (boo't-nēz', -nēs') n., pl. Bhutanese. 1. A native or inhabitant of Bhutan. 2. The Sino-Tibetan language of Bhutan. -adj. Of or characteristic of Bhutan, its people, or their culture and

language. bi-1 or bin- pref. [Lat. < bis, twice.] 1. a. Two <br/>biform> b. Both - of some piet, [Lat. > 015, twice.] 1. a. 1 wo > 010111 > 0. both sides, parts, or directions < biconcave> 2. a. Occurring at intervals of two < bicentennial> b. Occurring twice during < biweekly> 3. a. Containing twice the proportion of a specified chemical element or group necessary for stability < bicarbonate> b. Containing two chemical stories redicals or groups < biological both stability </p> Containing two chemical atoms, radicals, or groups <br/>biphenyl>

bi-2 pref. var. of BIO.
Bi symbol for BISMUTH.

bi-a-ly (be-a'le) n., pl. -lys. [After Bialystok, Poland.] A round, flat baked roll with onion flakes on top.

bi-an-nu-al (bi-ăn'yōo-əl) adi. Happening twice each year : SEMI-

ANNUAL — bi-an'nu-al-ly adv.
bi-as (bi'as) n. [OFr. biais, oblique.] 1. A line cutting diagonally across the grain of fabric. 2. a. An inclination or preference, esp. one that interferes with impartial judgment: PREJUDICE. b. A specified instance of this. 3. a. An irregularity or weight in a ball that causes it to swerve, as in lawn bowling. b. The tendency of such a ball to swerve. swerve, as in lawn bowling. b. The tendency of social a data of sacrification of the fixed voltage applied to an electrode. —vt. -ased, -as-ing, -as-se or -assed, -as-sing, -as-ses. 1. To cause to have a prejudiced view. 2. To apply a small voltage to (a grid).

\* syns: BIAS, PARTIALITY, PREJUDICE, PREPOSSESSION n. core mean

ing : an inclination for or against that inhibits impartial judgment <a

decision influenced by personal bias>
bi-ased also bi-assed (bi'ast) adj. Marked by bias.

bi-ath-lon (bi-ăth'lon, -lôn') n. [81: + Gk. athlon, contest.] An athletic competition that combines cross-country skiing and rifle shoot-

bi-ax-i-al (bî-ăk'sê-al) adj. Having two axes. -bi-ax'i-al-ly

bib (bib) n. [Prob. < ME bibben, to drink, perh. < Lat. bibere.] 1. A napkin tied under the chin and worn, esp. by young children, to protect the clothing while eating. 2. The part of an apron or overalls covering the chest. -v. bibbed, bib-bing, bibs. -vt. To drink: imbibe. -vi. To indulge in drinking: TIPPLE. bib and tucker n. Informal. Clothing.

bibb (bib) n. [Alteration of BIB.] 1. A bracket supporting the trestle-

trees on a ship's mast. 2. A bibcock. bib-ber (bib' or) n. [< BIB.] A tippler

Bibb lettuce (bib) n. [After Jack Bibb, 19th-cent. American vegetable grower.] A lettuce forming a small, loose head and having tender, dark-green leaves.

bib-cock (bib'kok') n. A faucet with a nozzle that bends downward. bi-be-lot (bê'b-lô', bê-blô') n. [Fr. < OFr. beubelet, from a redup. of bel, beautiful < Lat. bellus, handsome.] A small ornamental object

Bi-ble (bi'bal) n. [ME < OFr. < Med. Lat. biblia < Gk., pl. of biblion. held to be authoritative in its field <the bible of Japanese cooking> Bible Belt n. Sections of the United States, esp. in the South and

Middle West, where Protestant fundamentalism prevails. bib·li·cal also Bib·li·cal (bib'li-kal) adj. [Med. Lat. biblicus < bib-li-cal also Bib-li-cal (bib'li-ka)) adj. [Med. Lat. biblicus <br/>
biblia, Bible.] I. Of, relating to, or contained in the Bible. 2. Being in keeping with the nature of the Bible, esp.: a. Suggestive of the people or times depicted in the Bible. b. Suggestive of the prose or narrative style of the King James Bible. — Bib'li-cal-ly adv.<br/>
Bib-li-cist (bib'li-sist) n. 1. An expert on the Bible. 2. A literal interpreter of the Bible. — Bib'li-cism n.<br/>
biblio-pref. [< Gk. biblion, book. — see Bible.] Book < bibliophile> bib-li-o-film (bib'lē-ō-film') n. Microfilm used esp. to photograph book nages.

bib-li-og-ra-pher (bib'lē-ōg'rə-fər) n. 1. An expert in the description and cataloguing of printed matter. 2. A compiler of a bibliography or bibliographies.

bib-li-og-ra-phy (bib'lē-og'ra-fē) n. pl. -phies. 1. a. A list of the works of a specific author or publisher. b. A list of writings on a single subject. 2. Description and identification of the editions, dates of is sue, authorship, and typography of written material, as books

ď

dis-mis-sion (dis-mish'an) n. Dismissal.

dis-mis-sive (dis-mis'iv) adj. 1. Serving to dismiss. 2. Showing indifference or disregard <a dismissive shrug>

dis-mount (dis-mount') v. -mount-ed, -mount-ing,
-mounts. -vi. To get off or down, as from a horse or bicycle: ALIGHT. -vt. 1. To remove from a mounting, setting, or support. 2. To unseat, as from a horse, 3. To disassemble (a mechanism), -n. (dis'mount'). The act or manner of dismounting esp. from a horse. dis-mount'a-ble adj.

dis-o-be-di-ence (dis's-be'de-ans) n. Failure or refusal to obey.
—dis'o-be'di-ent adj. — dis'o-be'di-ent-ly adv.

diso-bey (dis'o-bā') v. -beyed, -bey-ing, -beys. [ME disobeien < OFr. desobeir < VLat. 'disobedire: Lat. dis., not + Lat. oboedire, to obey. -see ober.] -vi. To refuse or fail to obey an order or rule. -vt. To refuse or fail to obey -blige (dis'o-blij') vt. -bliged, -blig-ing, -blig-es. 1. To neglect or refuse to act in accord with the wishes of. 2. To offend, as

by slighting. 3. To inconvenience. — dis'o-blig' ing-ly adv. dis-or-der (dis-or'dər) n. 1. Lack of order or regular arrangement:

CONFUSION. 2. A breach of civic order or peace: public disturbance. 3. An ailment that affects normal, healthy functioning. -vt. -dered, -der-ing, -ders. 1. To throw into disorder or confusion. 2. To disturb the normal physical or mental health of : DERANGE.

dis-or-dered (dis-or/dord) adj. 1. In a condition of disorder: DIS-ARRANGED. 2. Physically or mentally ill: DERANGED. —dis-or/dered-ly adv. —dis-or/dered-ness n. dis-or-der-ly (dis-or/dor-le) adj. 1. Lacking regular or logical order accessed 2. New disingle design adj. 2. Lacking regular or logical order to the distinction of the dist

or arrangement. 2. Not disciplined: UNRULY. 3. Disturbing the public peace or decorum. - dis-or'der-li-ness n.

\* syns: 1. DISORDERLY, MESSY, UNSYSTEMATIC adj. core meaning: lacking regular, logical order <a disorderly room full of junk> ant: ORDERLY 2. DISORDERLY, RIOTOUS, ROWDY, UNRULY adj. core meaning:

upsetting civil order or the peace <a disorderly mob> disorderly conduct n. Law. A petty offense involving a disturbance of public peace or decorum.

dis-or-gan-ize (dis-or/ga-nīz') vt. -ized, -iz-ing, -iz-es. To destroy the organization, structure, or unity of. - dis-or'gan-i-za'-

stroy the organization, structure, or unity of. —dis-or'gan-i-za'-tion n. —dis-or'gan-i-zed adj.

dis-o-ri-ent (dis-or'ē-ēnt', -ōr'-) vt. -ent-ed, -ent-ing, -ents.

To cause to lose one's sense of direction, position, or relationship with one's surroundings. —dis-o'ri-en-ta'-tion n.

dis-own (dis-on') vt. -owned, -own-ing, -owns. To refuse to claim or accept as one's own: REPUDIATE.

dis-par-age (di-spăr'ij) vt. -aged, -ag·ing, -ag·es. [ME dispar-agen, to degrade < OFr. desparager: des. apart (< Lat. dis-) + parage, rank < per, peer. — see Peer.] 1. To speak of in a belittling way.: Decry. 2. To reduce in rank or esteem. — dis-par'age·ment n.

-dis-par'ag-er n. -dis-par'ag-ing-ly adv. dis-pa-rate (dis'pər-it, di-spăr'it) adj. [Lat. disparatus, p.part. of

disparate (us) parti, ui-sparti ad. [Lat. disparatus, p.part. or disparate, to separate: dis., apart + parate, to prepare.] Completely dissimilar. — dis'pa-rate-ly adv. — dis'pa-rate ness n. dis-pari-ty (di-spar'1-tē) n., pl. -ties. [OFr. disparite < LLat. disparitas: Lat. dis., not + Lat. paritas, equality < par, equal.] 1. The condition or fact of being unequal in age, rank, or degree: DIFFERENCE. 2.
